

# Community Content & Upload Policy

**Last Updated:** April 2026

This policy applies to all users, contributors, and creators (collectively, "Users") who upload images, titles, and descriptions (collectively, "Content") to the platform.

## 1. Niche Content Restriction: "Food Only"

Our platform is a dedicated space for culinary appreciation.

- Users may only upload photographs where the primary subject is food, beverages, or raw ingredients.
- We strictly prohibit the upload of images featuring people (portraits/selfies), animals, landscapes, architecture, or any non-food-related subjects.
- Content that does not focus on food will be removed without prior notice to the User.

## 2. Prohibition of AI-Generated Content

To preserve the authenticity of our community and the integrity of food photography, the use of Artificial Intelligence (AI) to create images is strictly forbidden.

- All uploaded images must be captured using a physical camera or smartphone by a human being.
- We reserve the right to use detection software to identify synthetic or "deep-fake" food imagery.
- Users found to be systematically uploading AI-generated content will be subject to a permanent ban from using **Garraba**.

## 3. Content Accuracy & Metadata

The relationship between the visual and the textual content must be honest and direct.

- The title and description of a post must accurately describe the specific food items displayed in the accompanying photograph.
- Users may not use "clickbait" titles, irrelevant descriptions, or unrelated promotional text that does not pertain to the image provided.

## 4. Copyright and Intellectual Property

By submitting Content to this platform, the User represents and warrants that:

- They are the sole creator and owner of the photograph, or have obtained explicit, written legal permission from the copyright holder to publish the image.
- Content must not be "scraped," "hotlinked," or saved from third-party websites, social media, or food blogs without the owner's consent.
- By uploading, the User grants the platform a non-exclusive, royalty-free license to display and distribute the Content for the purposes of operating the service.
